DGA® agent is essentially colorless, slightly viscous liquid with a mild amine odor. DGA is miscible with water, alcohols, and aromatic hydrocarbons, but relatively immiscible with aliphatic hydrocarbons and ethyl ether. Isometric with diethanolamine; however, the primary H₂N group makes it more reactive.

\[
\text{H}_2\text{N—CH}_2\text{CH}_2\text{OCH}_2\text{CH}_2\text{OH}
\]

**APPLICATIONS**
- Used for carbonyl sulfide (COS) removal from liquid hydrocarbon streams
- Used as a selective solvent for recovery of aromatics from refinery streams
- Removes carbon dioxide (CO₂) and hydrogen sulfide (H₂S) from natural and refinery gas, aliphatic hydrocarbon liquids and other sour hydrocarbon streams.
- Preparation of foam stabilizers, wetting and emulsifying agents, condensation polymers, photoresist strippers, and amides for personal care and metalworking applications.

**ADDITIONAL INFORMATION**

**Regulatory Information**
- DOT/TDG Classification: 2-(2-aminoethoxy)ethanol
- HMIS Code: 3-1-0
- WHMIS Classification: E
- CAS Number: 929-06-6

**Chemical Control Laws**
- Australia, AICS: Listed
- Canada, DSL: Listed
- Europe, EINECS/ELINCS: Listed
- Japan, METI: Listed
- United States, TSCA: Listed

**Typical Physical Properties**
- Boiling point, °C (°F): 221 (430)
- Flash point, PMCC, °C (°F): 124 (255)
- Freezing point, °C (°F): -12 (10)
- pH: 12
- Specific gravity, 20/20°C: 1
- Vapor pressure, mm Hg, 20°C (68°F): < 0.01
- Vapor Density: 4
- Viscosity, cSt, 51.7°C (125°F): 7.5
- Water solubility: > 10
TOXICITY AND SAFETY
The principal health hazard from accidental exposure to DIGLYCOLAMINE® agent is a moderate-to-severe irritation/corrosion of the eyes, skin, and mucous membranes. Chemical-type goggles with face shield must be worn during handling or use of the undiluted product or concentrated solutions. Contact lenses should not be worn. Protective clothing, and gloves resistant to chemicals and petroleum distillates, must be worn.

Should accidental eye contact occur, flush eyes with large amounts of water for at least 15 minutes. Eyelids should be held apart to permit rinsing of entire surface of eyes and lids. Get medical attention immediately. For skin contact, immediately flush skin with large amounts of water for at least 15 minutes. Get medical attention immediately. Contaminated clothing should be laundered before reuse.

HANDLING AND STORAGE
For detailed information on the storage and handling of DGA® agent, see our bulletin on “Storage and Handling of DGA agents”.

AVAILABILITY
DGA agent is available in coiled tank cars, tank wagons, and High Density HMW Polyethylene drums, 480 pounds net. DOT label required: corrosive. Freight classification: Chemicals NOIBN. Gas treating compound. It is available world-wide with manufacturing facilities in U.S. and Europe. Samples are available by contacting our sample department at 1-800-662-0924.
