Fax: +33 (0)3 21 46 46 59

Typical Analysis

Appearance: Grey/buff solid								
MgO soluble	21.5	%	Ni	60	ppm	Mo	<5	ppm
MgO total	27.0	%	Zn	10	ppm	Cd	<1	ppm
SO ₃ soluble	48.0	%	As	<10	ppm	Pb	<5	ppm
SO ₃ total	48.0	%	Cu	<10	ppm	Hg	<1	ppm
Cr	0.13	%	Se	<10	ppm	Cr ⁶⁺	<0.3	ppm

Environment/Health/Safety/Handling

Refer to Safety Data Sheet.

Intended For Use in the Following Applications:

- (i) The product has been extensively tested for suitability in agricultural applications. Classified as a Magnesium sulphate fertiliser according to the French standard NFU 42-001 (Class III, Type 2a). Can be used directly or incorporated into blended products. The maximum recommended spreading rate for direct use is 400 kg/ha.

Restrictions on Use

Use outside the intended applications has not been tested and may have damaging effects.

Other Uses

The Company welcomes the opportunity to work with customers on new product applications. Please contact above address to discuss applications that are not currently listed.

*This document is a general guide to the properties and potential applications of the product. Further information is available from personnel within the Company.
Although all the information and recommendations in this publication are given in good faith, in all cases, it is the responsibility of the user to determine the accuracy and applicability of such information and recommendations and the suitability of any product for its own particular purpose. Nothing herein is to be construed as being a warranty and any implied warranty or condition (statutory or otherwise) is excluded to the maximum extent permitted by law.
You should ensure that any process you use or product you make using the Company's product does not infringe any patent.*
