Construction year:	April 2012
Vertical wall size:	100 square meters (sqm)
Building type:	Private property
Vegetation:	FLEXIVERDE [®] system
Vertical wall installer:	Poliflor, Italy

Restaurant at Garda Lake

The FLEXIVERDE[®] system from Poliflor, which contains VYDRO[®] substrate, has been used to create a vertical wall of 100 sqm of a restaurant, situated along the Garda Lake of Italy.

The main objective of the project was to create a vertical garden on the external fence of the restaurant providing a green atmosphere on the terrace.

After 3 months already, the vertical wall was fully covered by the plants.
