

Performance Additives

for the metalworking industry

HUNTSMAN PERFORMANCE EMULSIFIERS

SURFONIC[®] SM Sodium Sulfonates

- Produced from Huntsman alkylates
- Low foaming
- High active content
- Excellent emulsification performance
- Good corrosion inhibition

SURFONIC[®] MW-100 Additive

- Single component vegetable oil emulsifier
- Improved hard water tolerance
- Formulation of macro or micro emulsions
- Long lasting emulsion stability

SURFONIC[®] LF Series

- Alkoxylate surfactants with low foaming and excellent wetting
- Emulsifier and rinse aid for metal cleaning
- Surface active to help remove soils
- Very soluble in acidic formulations
