

## FORMULATOR OR CHEMICAL PROCESSOR...

Are you familiar with JEFFSOL™ carbonate solvents? Huntsman Corporation markets three carbonate products, each of which is an excellent solvent. They are JEFFSOL EC Ethylene Carbonate, JEFFSOL PC Propylene Carbonate, and JEFFSOL EC-50 (a 50:50 blend by weight of EC and PC).

Inside this folder are laboratory test results that show the solubility of many compounds in our three carbonate products. As a formulator, or chemical processor, you can use this data to choose a powerful solvent or miscibilizing agent — one that just may be the answer to improving your formulation.

If you have questions about this Miscibility Chart, or about our products, please contact our Technical Service representative (512) 483-0041.
