**Dr. Anja Weismann is product technology manager TPU (thermoplastic polyurethanes) for Huntsman.**

Anja started her career as a development chemist at Morton International in 1998. Following the company's merger with Rohm & Haas in 1999, and its subsequent acquisition by Huntsman in 2000, she transferred with the business. Working in the United States from 2001, Anja spent three years supporting the set up of local TPU manufacturing capabilities and coordinating the ISO 9001 qualification process for the company's plant at Ringwood, Illinois.

In 2004 Anja moved back to Europe where she managed the installation of a continuous pilot plant in Osnabruck, Germany. She also played a lead role in the implementation of a new management system for the TPU technical group. Since 2011, she has been the Global custodian for Product Stewardship within the TPU business. Today Anja leads Huntsman's Product Technology group located in Osnabrück, responsible for managing all aspects of customer development projects globally and providing technical services to the EAMEI region.

Anja has a PhD in chemistry from the University of Stuttgart.
