Huntsman Pigments division wins Best Technology Application of the Year award at the 2013 Plastics Industry Awards

Huntsman Pigments division has won the Best Technology Application of the Year award for ALTIRIS® infrared reflecting pigment at the 2013 Plastics Industry Awards. The award was presented to members of the ALTIRIS® pigment team in London on Friday 27th September.

Sean Reid, commercial manager, Huntsman Pigments division said, "We're absolutely delighted to have received recognition for our infrared pigment innovation in this way. We believe ALTIRIS® pigment has the potential to deliver considerable benefits to the polymers industry.

The judges commented that ALTIRIS® pigment is 'an innovative approach to the development of a new type of pigment. It tackles an old problem of heat stability for polymers in a new way. The technical challenges and analytical techniques required to achieve the result highlight a thoughtful approach to the work. This is a clear winner in the application of innovative technology.'

Launched in 2001 the Plastics Industry Awards are known as the Oscars of the UK plastics industry. They are firmly established as a respected accolade rewarding innovation and exceptional performance in materials usage and design and manufacturing as well as training and environmental performance.

Huntsman will showcase ALTIRIS® pigment this month at the K2013 plastics show in Düsseldorf, Germany. Visit the Huntsman stand F79 in Hall 8b to find out more or contact us at pigments_info@huntsman.com.
