

A Leading Global Supplier of Energy-Saving Polyurethane Insulation

- Leading Provider of MDI-based Polyurethane (PU) Insulation Materials
- 11,000 Employees in Multiple Locations Worldwide
- 45 Years of Polyurethane Experience
- Proven Record of Scientific and Technological Innovation
- Dedication to Sustainable Chemistry

Typical PU Applications

Insulation Board and Block (Polyiso)

- Used in roofing, flooring and cavity applications
- Featured in 73% of all new low-slope roofs in the United States

Commercial:
Insulation Board and Block (Polyiso),
Insulated Metal Panels,
Spray Polyurethane Foam
and OCF

Residential:
Spray Polyurethane
Foam, OCF and
Polyiso Sheathing

Other:
Pour-in-Place Insulation
and Pipe Insulation

Spray Polyurethane Foam and OCF

- Used in building envelopes, roofs and attics
- Reduces heat loss
- Can act as an air barrier
- One component foam (OCF) excellent for weatherization

Insulated Metal Panels

- Used in cladding, partitioning, load-bearing walls and roofs
- High thermal insulation values
- Easy on-site installation

Pipe Insulation

- Used for oil and gas pipelines, power stations, refineries, etc.
- Prevents heat loss and insulates
- Handles a wide range of temperatures

Pour-in-Place Insulation

- Used in the cavities of refrigerators, coolers, doors, water heaters and structural insulated panels (SIPs)
- Delivers energy savings

HUNTSMAN

Enriching lives through innovation
